

Using Spectrum Engineering's PDF Data Collection Forms

Do I have to use Spectrum Engineering's forms?

No. Any suitable file format is acceptable – so long it contains sufficient information.

Which form should I use?

If you do want to use our forms:

- Use **Form 1 (Links)** for fixed point-to-point links. The form is designed to collect data for a single 2-way link. The form can also be used for 1-way links by leaving some fields blank.
- Use **Form 2 (Land Mobile)** for land-mobile, fixed point-to-multipoint, ambulatory or similar services of a "point to area" nature.
- Use **Form 3 (Site Details)** to provide additional site details if required when filling out Form 1. This form is only required when you cannot identify a site in the ACMA database by its ACMA Site ID either because you do not know it or in the case of a new site.
- Use **Form 4 (Client Details)** to provide details about the licensee. This form is only required when you cannot identify the licensee in the ACMA database by the ACMA Client Number.

What software do I need to fill in the forms?

The forms use the Adobe PDF format and you only need the Acrobat Reader software to be able to fill in the forms and save them. Adobe Acrobat Reader is available free at <http://www.adobe.com/products/acrobat/readstep2.html>
